

## Doctor Asked To Take Post, To Save Town

ST. JAMES, Beaver Island, Mich., July 23 (UPI)—This isolated resort town may turn into a ghost town if it doesn't get a doctor soon.

The town's 200 residents are members of a stampede "mass-migration" back to the mainland, leaving because their only doctor is leaving. And he still hasn't been re-appointed.

The situation wouldn't be as serious if the island were easier to reach. During the summer it can only be reached by plane, and it's even worse in winter when the long stretch of ice to Beaver Island and mainland is completely blocked by high ice formations.

There's no present physician. Dr. Harry F. Vail departs for the mainland Sept. 1, to take over a larger practice.

He came here for his health four years ago, replaced Dr. Russell Palmer who was recently succeeded by Dr. John C. Johnson.

Most island residents pointed out that any doctor who wants the job will have two requirements: well-equipped to handle emergencies, and willing to work in the additional discomfort of a regular state-paid placement of a regular state-paid salary plus a fee.

In addition, living here is like being on a year-round vacation, the islanders claim. The islanders all claim to be building a modern clinic at St. James, the island's only town. It has a community hall, a post office, a general store, two bedrooms, a gymnasium room and surgery, an X-ray room and a pharmacy.

The doctor gets a minimum salary

of \$300, which ranges between \$300 and \$750, and can keep all the fees his practice brings in.

## Lester M. Powell Claimed by Death

GLENDALE, Calif., July 23—Lester M. "McFerson" Powell, 60, former in Falls resident and a member of the Twin Falls Fire Department, died July 11 in Glendale, Calif., after an 11-day illness.

While in Twin Falls, Mr. Powell was a supervisor of American Electric company and had a radio shop with Deltawell brothers. He moved to Glendale in 1948.

A electrical engineer until his retirement in January, Mr. Powell had helped establish the electronics laboratory at U.C.L.A. In his widow, Betty Powell; two sons, James Powell, Anaheim, Calif., and Richard Powell, West Covina, Calif.; a daughter, Mrs. John N. Burch, Glendale, Calif., and 11 grandchildren.

Funeral services were held July 12 at the Episcopal Church of the Holy Apostles. His final rites were in a Grandview Memorial park, both in Glendale.

Rank Promotions  
Awarded Officers

Promotions of officers of the 100th air force reserve squadron were announced Monday by T/Sgt. George C. Thompson, 100th AFM officer. Officers promoted are: service not active duty.

In flight, promotions include: Captain John C. Reichen, from major to major; Major A. Anderson, Willard H. Hull and Tom J. Stuart, all Twin Falls, from first lieutenant to captain; Captain E. C. Gooding, from first lieutenant.

Flight promotions include: Lieutenant John G. Blieck, Wells, and Major E. E. Eke, both major.

Airfield Thaxton, Burley, has been promoted from first lieutenant to captain in C flight, stationed at Blythe.

## Hawaii Rodents Better Go Underground When Expert Exterminator Visits Island

Rodents and predatory animals in forest about a home life," he said. "But it would be better off if they remained underground this winter when Ben L. Evans, serving as assistant district agent for the fish and wildlife service, takes his wife, Irene, to Hawaii to spend a lifetime with."

Evans, who retires July 31 after 25 years with the service, will make the trip with his wife, Irene, to Hawaii to spend a lifetime with them.

"I'm going to go to the islands for a vacation," he said. "But after I get there, I'm going to be traveling I've done on the job. I'm going to enjoy being home for awhile."

Although he's only home five or six days a month even now, Evans, whose headquarters was in Carey until June of 1955, said that the rodent population in the islands is greater than it was when he first started.

Mrs. Evans taught school in California during his first four years with the service, and when he was promoted to assistant district agent in 1952, she accompanied him on his home trips during the summer.

"A man on this job might as well

be a rotted log," he said. "But after I get there, I'm going to be traveling I've done on the job. I'm going to enjoy being home for awhile."

## Idaho Youths Attend Boys Nation Event

WASHINGTON, July 23 (Special to the Times-News) — John Lavelle Clegg, Idaho, and John D. Conger, Iowa, are now in Washington attending Boys' Nation, an annual program of the American Legion.

They are among 50 high school junior boys attending eight days here. The event opened Friday and will continue through July 28.

During their stay the group will hold their own session and select their own cabinet and Supreme Court.

They will conduct party conventions, make resolutions, and elect their own President and vice-president.

They will consider the

use to which the electoral college

should turn over to the vice

President the chief executive

in the event of the chief executive's physical disability.

Each boy will receive a totaling

from the country's military leaders

and a day trip to the capital

and the Supreme Court, the

Archives, and other govern-

mental buildings.

The program was launched by

the American Legion in

1947.

Each year 50 outstanding boys

from each state who have partici-

pated in their state boys state

as chosen to represent their

state. The Governor of the

state, Conger was

lieutenant governor.

Jenner's Remark Quoted by Demo

WASHINGTON, July 23 (Sen. William E. Jenner, R., Ind., was quoted yesterday as saying he de-

manded that the Senate Foreign Affairs Committee, during a television inter-

view,

A reporter noted that Jenner

privately had asked a Republi-

can senator, "What are you go-

ing to do if they have to run me

out?" Jenner replied, "I don't

know. I'm going to run. Asked

he said it. Jenner named Jen-

ner, 46, as the only Republi-

can senator to make the remark either

on the Senate floor or in a newspaper interview.

Adult Education Gains Told Meet

SALT LAKE CITY, July 23 (UPI)—Dr. John Dyer, dean of adult education at the University of Utah, told a public education conference on higher education here Saturday that there are now nearly as many permanent adult education courses as attend regular college classes in America.

Some 180 educators from 25 univer-

sities and colleges attended and passed a resolution

urging college athletic departments

to maintain the same academic

standards as the rest of the school

departments.

Fires Fortune Heir Gets Married

BROCKSVILLE, O., July 23 (AP)—

Harvey S. Firestone III and Beverly

McAllister, a school-teacher,

were married here Saturday in a

simple ceremony.

Firestone is heir to the vast Fire-

stone Tire and Rubber company

fortune. His bride has taught

third grade in Brook-

ton, O., for the past two years.

Harvey S. Firestone, Jr., was his

best man. He is chairman of

the board of the Firestone company.

Ambassador to Panama Julian Werning; two unidentified uniformed officials flanking the President and Panama President Ricardo Arias. (AP wirephoto)

## 26 Injured in Derailment of Speedy Train

CARROLLTON, Mo., July 23 (UPI)—A passenger train from Santa Fe to San Francisco, Calif., derailed last night, injuring 26 of the 122 passengers aboard.

There were no fatalities. Many of the passengers were treated at hospitals and released to continue on their journey. Others were given a night's rest.

Local Missouri highway patrol reported 20 of the 26 were listed cases.

Many of the 122 passengers and 27 crew members probably owe their lives to the fact that the train was the Santa Fe's second newest passenger train and is capable of speeds up to 80 miles an hour.

Santa Fe officials in Chicago said the train was traveling at 70 miles an hour when it derailed.

At 6 a.m. (EDT) today, a substitute train made up in Kansas City arrived to take the uninjured passengers on their way. Traffic controllers over 100 miles around the crash scene were held up after some of the highest temperatures in recent times.

At least 25 persons were reported to have died Saturday.

## Navy Announces Building Project

WASHINGTON, July 23 (UPI)—The Navy has informed Sen. Irving M. Ives, R., N.Y., that the navy's sixth Forrestal-class carrier will be built at the New York Naval Shipyard, Brooklyn, N.Y.

The big ship, which will cost about 200 million dollars, is part of the navy's shipbuilding program for the fiscal year.

The navy has followed a policy of alternating between naval and private shipyards in the construction of Forrestal-class carriers. The New York naval shipyard recently completed the USS Saratoga.

Meanwhile, the navy informed Sen. Thomas H. Kuchel, R., Calif., that an atomic submarine will be built at the New York naval yard outside San Francisco.

At 6 a.m. (EDT) today, a substitute train made up in Kansas City arrived to take the uninjured passengers on their way. Traffic controllers over 100 miles around the crash scene were held up after some of the highest temperatures in recent times.

## I. F. Airport Now Is Fanning Field

IDAHO FALLS, July 23 (UPI)—It's Fanning field now.

The name became official Friday when the city council changed the name from the old Fanning Field, which was the original name of the late Mayor E. W. Fanning. Mayor Fanning died last March.

Major John B. Rogers, who was appointed by the city council to replace the late mayor, urged the change in view of the fact that Fanning was one of the leaders in development of the airport.

Other towns and cities will report to the city council to change the name of their airports in honor of the late Mayor E. W. Fanning.

Major John B. Rogers, who was

DETROIT, July 23 (UPI)—When fellow police officers in suburban Lincoln Park received permanent identification cards, they wore them for the rest of the summer, Capt. Walter Early reported.

Early then got special permission to continue wearing long sleeves.

Seems he burns easily.

Secretary of the Interior Seaton, announcing this today, said it is made possible by appropriation of slightly more than \$100,000.

Republican candidates for state and local offices also have been invited to speak.

## Stocks

### MARKETS AT A GLANCE

NEW YORK, July 22 (UPI)—A strong market for rails reflected the stock market into somewhat higher ground in late trading.

The market improved in the afternoon.

Markets—Quiet, changes narrow.

Chairs—None.

Coats—Early down with other gains.

Cards—Very weak, old card crop ends.

Cats—Very weak, big card crop ends.

Hay—Very weak, good crop out.

Hayseeds—Very weak, good crop out.

Hides—Strong to 21 cents top.

Hides—Hides—20 cents to 21.50 high.

Hides—Hides—20 cents to 21.50 high.

Market—None.

Meat—None.

**Water Project****Help for West  
Okayed in Bill**

WASHINGTON, July 23 (Special) — The Senate passed a bill Friday providing for federal aid and participation in water and reclamation projects.

The house also has passed the bill and it will go to the President to be signed.

The bill applies to the 17 western reclamation states.

It permits the states, their agencies and interstate agencies to construct reclamation enterprises up to a cost of five million dollars with the federal government giving up to 75 percent of the total.

Idaho has 40 existing projects for this program, the bureau of reclamation discovered.

Cost of the 17 states is \$104,303,247 or potential new land and 85,023 acres of supplemental land.

Power aid will be in the form of loans to be repaid within 50 years and grants for flood control and navigation.

All projects must be approved by the department of interior and congress, except those under \$500,000, which do not need congressional approval.

Proponents of the bill believe that it will eliminate high federal overhead in the construction of local projects.

The contention is that planning and work can be done more cheaply on the local level.

**System Is Praised  
As Dam Dedicated**

SPokane, Wash., July 23 (UPI) — Dr. William A. Peary told a group attending the dedication of a new dam that the "integration" of power facilities throughout the Pacific Northwest made such projects possible.

The head of the Bonneville power administration gave the main address at the ceremony officially opening the new 100,000-kilowatt hydroelectric plant of the utility district's 18-million-dollar power plant near here.

"Without doubt, this project would have been feasible," Dr. Peary said. "At a time when power is low in Box Canyon, it is high somewhere else in the system."

**New Airfield for  
Idaho Dedicated**

SANDPOINT, Idaho, July 23 (UPI) — Some 150 persons from the state and from the Washington area flew here yesterday to attend the dedication of Sandpoint's new municipal airport.

Chief Master Mechanic, director of aeronautics, described the airport as one of the finest small fields in the state. It is big enough for twin-engine planes.

It also was the state's third annual breakfast of the season. Others will be held Sept. 8 and Oct. 13.

Largeest known elephant tusk found in country was 11 feet long, eight inches thick.

**Damaged Ship Reaches Port****Paint Blamed  
By Envoy for  
Her Ailments**

WASHINGTON, July 23 (UPI) — Ambassador Clare Booth Luce said today "very, very old paint" falling from beams in her embassy residence began to make her ill about 18 months ago.

Over a period of a year, she said, she must have breathed and eaten paint, which may have damaged her heart. This may have weakened her for her recent illness, she said.

Her first public statement on the paint problem was made May 10, when Ambassador Luce told reporters as she left by air for Lisbon, Portugal, and a three-

Mediterranean cruise. After the cruise, she will return to her duties in Rome.

The story of arsenic fumes roses painted on ceiling beams in her residence "became known" this week in TIME magazine published by her husband, Henry Luce, publisher of the magazine.

"I am sure that the 'famous' fall of arsenic had caused the long series of illnesses which have been in Mrs. Luce since she became ambassador to Italy over three years ago."

The poisoned paint cause of the illness has been questioned both in the United States and in Italy.

**Ambassador Talks**

Ambassador Clare Booth Luce talks to reporters at Washington's National airport before leaving for Europe by air. Mrs. Luce, U.S. ambassador to Italy, was stricken by arsenic fumes and fumes from painted decorations on her bedroom ceiling in the embassy in Rome, has been in this country since May. She is flying to Lisbon, Portugal, for a three-week Mediterranean cruise. (AP wirephoto)
